

TEMPLATE FOR STORYBOARD

This is a template you can use to create your storyboard. It is designed to help you focus your ideas and gather consistent information. Feel free to be as creative as you want to be, and make any changes where needed.

Each of the pages is set up to print on regular 8-1/2 x 11 paper and tacked to foam board. If you don't have a place to display a board in the nursing home, the pages can be tacked to a bulletin board.

Graphics can really liven up the pages and attract attention if you have a staff member who has a creative knack, but are not necessary or expected. We are not expecting perfection, nor are we expecting anything expensive or fancy. This is just another way to communicate with your facility and community.

[Nursing Home Name]

Storyboard Presentation

Resident-Centered Care

Collaborative Project

Nursing Home Quality Initiative

[Nursing Home Name]

Demographics of _____

- # of beds
- Location
- Demographics of population
- Other interesting info

OUR SHORT-TERM GOALS

[Insert your facility goals for creating a culture that is resident or person-centered.]

OUR LONG-TERM GOALS

[Insert your facility goals for a culture that is resident or person-centered.]

OUR TEAM

Team Members

[Insert team members]

(Idea: include a picture of the team)

Where did we begin?

[Insert data and background information to provide a snapshot of your cultural environment BEFORE beginning this collaborative project. This may include structure, atmosphere, processes, or other qualities.]

CHANGES TESTED

[Insert the changes your facility has tested]

RESULTS

[Insert the results of the tests]

Where are we now?

[Insert data and background information to provide a snapshot of your cultural environment AS A RESULT of this collaborative project. This may include structure, atmosphere, processes, or other qualities.]

NEXT STEPS

[Insert your facility's next steps]

Lessons Learned

[Insert data and background information to illustrate lessons that you have learned throughout this process.]
